

Risk Assessment - COVID 19 and other identified infectious diseases requiring Government/PHE guidance to be followed September 2021

*This RA has been produced using the most up to date Government/DfE guidance in relation to COVID-19
and will be updated as new guidance is released*

Where a different Infectious Disease is reported, PHE will be consulted and guidance sought on actions to take, the below will also be used if deemed acceptable.

Quality Assurance Cycle

RA Review Cycle

Review date	Version No	Headteacher + Date	H&S Manager + Date
01/09/2021	1	Helen Bartley, 28.8.21	Joanne Patterson 6/9/21
17/12/2021	2	Helen Bartley, 17.12.21	Joanne Patterson 17/12/21

All RAs should be reviewed at least annually as best practice, if any changes are made affecting the RA before the annual review or following an accident/incident the RA should be revisited at that time and updated and where required re-issued to relevant parties

Note – ALL Risk Assessments to be amended using tracked changes, so that there is a documented history of all changes made.

Guidance Notes

The purpose of a Risk Assessment is to identify potential injury or damage that could occur during the undertaking of any activity. Control measures are then to be implemented to eliminate or reduce the severity and/or likelihood of such events taking place.

A risk assessment should be completed prior to any new task being carried out and anyone asked to perform the task should be made aware of the risk assessment relating to it.

The following steps should be taken when completing a health & safety risk assessment.

- Identify who could be affected
- Classify the worker type that this assessment applies to. This may be “Staff/Visitor/Contractor/All”
- Evaluate the task by assigning a Risk Evaluation score (Likelihood X Severity) to the column “before controls” for each of the listed action or hazards that are present when undertaking this task. These scores should reflect the risk present in the absence of any form of control, training or protective equipment. If the task involves an action or hazard that is not listed, add it in.
- Any Risk Evaluation score above 6 is **not** acceptable and must be identified.
- For each score over 6, control measures **must** be put in place to eliminate or reduce the severity and/or the likelihood of it happening.
- List all existing control measures for each action or hazard with a score of 4 or more.
- List any additional control measures that are required for each action or hazard with a score of 4 or more.
- A Risk Evaluation score after controls must then be added. Any score of over 12 after controls should **not** be undertaken unless a separate Risk Assessment for that task is written.
- Any Risk evaluation score of over 12 should not be undertaken until a full investigation is carried out to understand if the task needs to be carried out and if it can be carried out in a safer way.
- The original risk assessment should be kept by the line manager and made available to anyone who will be carrying out this task.
- A copy of the risk assessment must be made available to all staff who may be affected by the tasks/controls mentioned. A copy should also be uploaded to central server
- All risk assessments are to be reviewed on an annual basis / when the function supported by the risk assessment changes or when the control measures require a change.

Likelihood

Likelihood	Description	Score
Very Unlikely	Unforeseeable that an incident or injury could occur	1
Unlikely	An incident or injury may happen, but very unlikely	2
Fairly Likely	An incident or injury may happen	3
Likely	An incident or injury occurring is foreseeable	4
Very Likely	An incident or injury is a definite possibility	5

Severity / Consequence

Severity / Consequence	Description	Score
Insignificant	No Injury or Damage	1
Minor	Injuries only requiring possible on site first aid / Minor damage to site or equipment	2
Moderate	Injuries that may require off site assistance or absence from school / closure of areas or equipment	3
Major	Potential serious injury such as broken limbs or prolonged absence from school / Significant disruption to education	4
Catastrophic	Risk of Fatality / School closure	5

Risk Rating and Actions

	Very Unlikely	Unlikely	Fairly Likely	Likely	Very Likely
Catastrophic	5	10	15	20	25
Major	4	8	12	16	20
Moderate	3	6	9	12	15
Minor	2	4	6	8	10
Insignificant	1	2	3	4	5

Risk Rating	Score	Actions
1-2	No Action	Safe to continue task but control measures must be maintained
3-6	Monitor	Monitor task for improved controls measures in the future or significant change in task
8-12	Action	Existing controls need to be checked and look at possible improvements for carrying out task. Can the task be achieved in another way?
15-16	Urgent action	Advice should be sought from H&S Team on how task is completed and additional controls that may be necessary Can the task be achieved in another way?
20-25	STOP	Task should not be carried out.

Additional Comments (if required)

As COVID-19 becomes a virus that we learn to live with, we are required to reduce the disruption to children and young people’s education - particularly given that the direct clinical risks to children are extremely low, every adult has been offered a first vaccine and the opportunity for 2 doses by mid-September. Our priority is to deliver face-to-face, high-quality education to all pupils, therefore many of the restrictions / control measures that were in place prior to September 2021 are no longer required and therefore are no longer listed. We will of course ensure that should this change; we will update the RA and inform all interested parties.
